

The **Baby Line lighting fittings** are used for discreet lighting of baby rooms, as floor level lighting, night-time lighting by baby cots and by wrapping mattresses, or for the decorating of walls and furniture, for illuminating passageways and staircases, and also as emergency lighting giving a sense of security. A combination of modern LED technology and of unique pattern-designing stands for a myriad of applications. The Baby Line LED fittings have got a soft, pleasant-to-touch surface texture, which further emphasises their baby character.

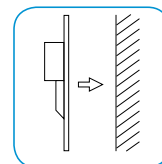

Application of the latest LED technology in the Baby Line fittings, characterized by, among others, low power consumption, made this lighting incomparably cheaper in use than traditional lighting methods. Our care for high quality of manufacture and minimal heat emission make the Baby Line fittings safe for little user and trustworthy for parents.

For feeding the LED fittings it is recommended to use **ZOL type power supply units made by SKOFF.**
